PROJECTS:

1. SM academy | MERN stack project

[Live Site](#) | [Client](#) | [Server](#)

Overview: It's a music school management website where admin can post various kinds of musical courses and students can perches with a secure payment method.

Features:

- A music school management website that showcases a variety of music courses available for students.
- Seamless enrollment system that allows students to register for courses and make payments securely.
- 3 roles management system: Student, Instructor and Admin. Only an admin can manage a user's role. Each role has specific dashboard.

Technologies: React.js , React Router , JavaScript , Tailwind CSS, Node.js, MongoDB, Express.js, Firebase , JWT , Stripe.js

2. Toy-land | MERN stack project

[Live Site](#) | [Client](#) | [Server](#)

Overview: An e-commerce website where we can find different types of toy planes for kids.

Features:

- An online toy marketplace website that offers a wide range of toys for children.
- Crud operation for user and seller to update and delete the toy.
- Firebase authentication

Technologies: React.js , Node.js , Swiper.js , MongoDB , Express.js , Firebase , Tailwind CSS

3. Chefer | Front-End project

[Live Site](#) | [Client](#) | [Server](#)

Overview: A frontend food site where we will be able to search for our desired food cooked by renowned chef.

Features:

- An online food delivery website that offers the best food delivery services.
- There is a login and register system implemented by firebase. If you want to view recipe than you have to register or login first.
- I also implement a privet route so you can't visit that page without login.

Technologies: React.js , HTML5 , Firebase , Tailwind CSS
